Sell more...
Stock less!

Are you looking for timely and accurate geography based secondary sales data?
Do you need to identify fast-moving, slow-moving and out-of-stock SKUs?

In today's uncertain economic environment, increasing profitability with a low investment solution is 'the goal' for every organization.
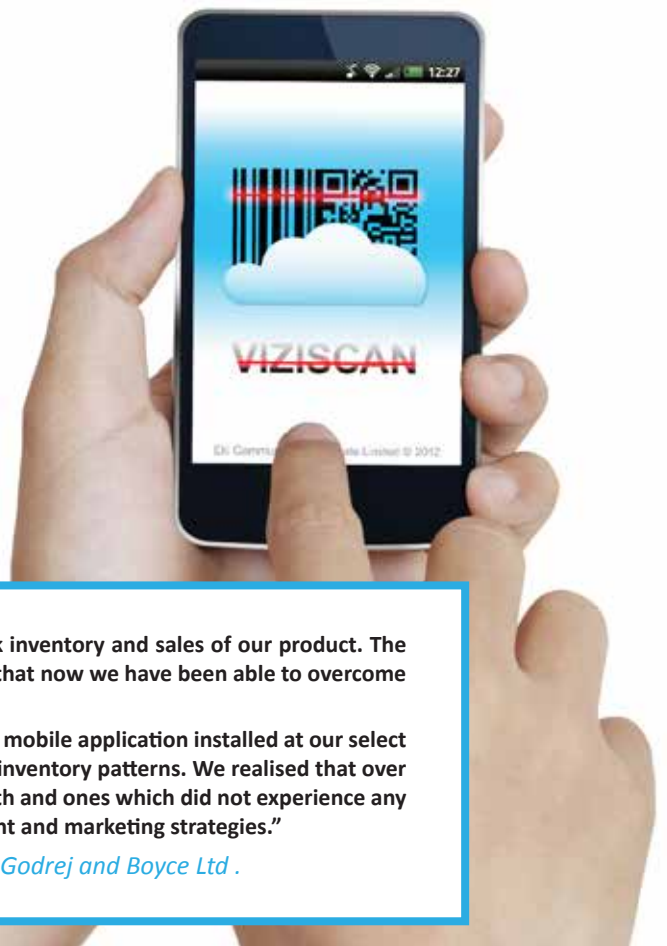

ViziScan provides a unique solution that helps organizations access the last-mile data in their distribution channel thus enabling them to maintain optimum inventory levels and increase inventory turns within their supply chain.

Eki's powerful mobile barcode scanning application captures sales as well as stock transactions based on barcodes/QR codes from secondary or tertiary supply chain nodes. Based on a cloud infrastructure, ViziScan enables easy daily data upload to the central server.

Unique Benefits:

- *Get real-time view of daily sales*
- *Avoid lost sales due to non-availability of stock*
- *Increase inventory turns*
- *Distinguish between Fast movers , Slow movers and Stocked out*
- *Reduce inventory*
- *Receive geography-wise , SKU-wise consumption*

ViziScan,
the supply chain mobility solution provides you with last mile intelligence at your fingertips!
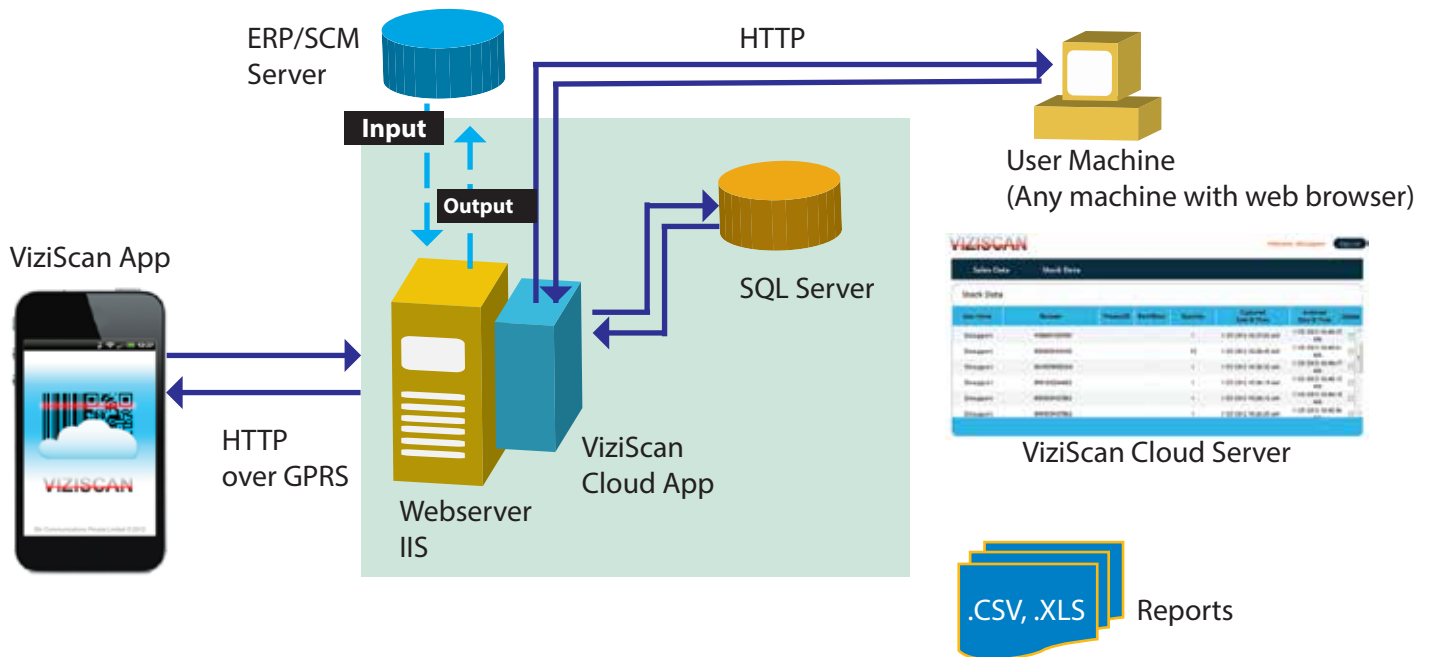

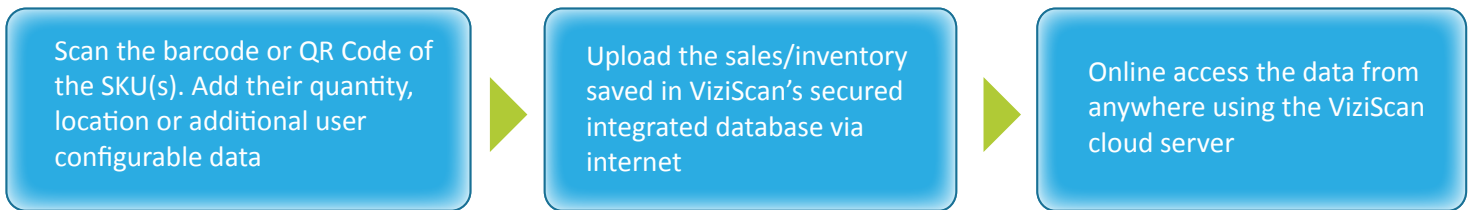

"One of the biggest challenges we faced was getting retailers to track inventory and sales of our product. The mobile based scanning solution from Eki is so easy and simple to use that now we have been able to overcome this challenge.

The transaction reports received from Eki into our systems, from their mobile application installed at our select outlets have provided us in-depth insight into the retailers' sales and inventory patterns. We realised that over the past year, which outlets have experienced quantum jump in growth and ones which did not experience any growth at all. This insight is valuable for us to define our replenishment and marketing strategies."

Aspi Wadia, Head of Retail, Godrej Locking Solutions & Systems, Godrej and Boyce Ltd .

ViziScan automates inventory record-taking in THREE easy steps

Scan the barcode or QR Code of the SKU(s). Add their quantity, location or additional user configurable data

Upload the sales/inventory saved in ViziScan's secured integrated database via internet

Online access the data from anywhere using the ViziScan cloud server

ERP/SCM Server

HTTP
